Non-Technical Summary

This Noise and Vibration Monitoring Report fulfils HS2 Limited's commitment detailed in the Environmental Minimum Requirements (EMRs), Annex 1, Code of Construction Practice, to present the results of noise monitoring carried out within Buckinghamshire (BS) during the month of December 2024.

Within this period noise and vibration monitoring was undertaken at the following worksites:

- A422 Turweston North worksite (ref.: A422 TN) where viaduct and overbridge construction, excavation, drainage works and material movements were underway.
- School End (ref.: SE) and Hermitage Chetwode (ref.: HC) worksites where overbridge construction, highway works, water management and haul and site access road maintenance were underway.
- Twyford worksite (ref.: TW) where viaduct works, water management, haul road and site access road maintenance were underway.
- West Street Overbridge worksite (ref.: WSO), where grouting, wingwall construction and reinforced bar fixing, pannel installation, drainage works, road works, waterproofing, bulk earthworks and technical backfill were underway.
- Calvert worksite (ref.: CAL) where reinforced concrete works, production of concrete, material movements, earthworks and drainage were underway.
- Woodlands worksite (ref.: WDL) where concrete repairs, material movements and dig and replace were underway.
- Quainton worksite (ref.: QAR) where ditch crossing construction, utility works, site access road construction were underway.
- Oat Close worksite (ref: OC) where overbridge works, excavation and stockpiling underway.
- Waddesdon worksite (ref.: WAD) where culvert construction, utility diversion, earthworks were underway.
- Thames Valley Viaduct worksite (ref.: TVV) where formwork installation and lifting of beams were underway.
- Risborough Road worksite (ref.: RR) where road construction and utility diversion were underway.
- Aylesbury Golf Course worksite (ref.: GC) where cutting, culvert construction and utility diversions were underway.

- Nash Lee Lane worksite (ref.: NLL) where abutment works, shutter installation, utility diversion works, installation of control points and temporary surface water management were underway.
- Wendover Green Tunnel worksite (ref.: WGT) where tunnelling works, road and utility works, excavation, protection slab construction, installation and removal of shutters, material movements and deliveries, backfilling, pre-treatment works, stoning and vegetation clearance were underway.
- Grove Farm worksite (ref.: GF) where piling, demobilisation, compound construction and ground investigation works were underway.
- Small Dean Viaduct Compound worksite (ref.: SDVC) where installation of precast, neoprene, sealant and backer rod, reinforced bar installation and prefabrication, bearing works, scaffold building, backfilling, sheet pile cutting, lowering of viaduct, welding and installation of generators and associated equipment were underway.
- Rocky Lane Embankment worksite (ref.: RLE) where deck false-work erection, reinforced bar fixing, road maintenance and realignment, and temporary surface water management were underway.
- Wendover Dean Viaduct worksite (ref.: WDV) where welding and bearing installation underway.
- Leather Lane worksite (ref.: LL) where sheet piling, drainage preparation work and installation of drilling platforms were underway.
- South Heath worksite (ref.: SH) where earthworks, utility works, general site activities, culvert works, overbridge construction, ground investigation works, site access and haul road construction and operation were underway.
- North Portal worksite (ref.: NP) where earthworks, utility works, general site activities, culvert works, overbridge construction, ground investigation works and site access and haul road construction and operation were underway.
- Chesham Road worksite (ref.: CHSM), where general site activities, internal and external building works, demobilisation and landscaping were underway.
- Little Missenden Vent Shaft worksite (ref.: LM) where site operation, tunnel connections, headhouse superstructure works and building construction were underway.
- Amersham Vent Shaft worksite (ref.: AM), where site operation, external and internal building works, tunnel connection, superstructure concrete works, pre-casting of boundary wall, steel, cladding and mechanical plant works were underway.

- Chalfont St Giles Vent Shaft worksite (ref.: CSG) where site operation, road maintenance, demobilisation and internal and external building works were underway.
- Chalfont St Peter Vent Shaft worksite (ref.: CSP), where site operation, road maintenance, demobilisation and internal and external building works were underway.
- Colne Valley Viaduct worksite, which is partly located in the London Borough of Hillingdon (LBH), (ref.: CVV), where jetty and haul road maintenance, jetty removal, compound operations, ground investigation, pumping water management, satellite compound welfare works, generator farm operation, environmental maintenance, viaduct deck and landscaping works were underway.

Further works, where monitoring did not take place, were also undertaken at the following locations:

- Grovill Embankment (Westbury) where excavation and replace was underway.
- School End North where bulk excavation, vegetation clearance, stockpiling, drainage, pond maintenance and excavation, removal of badger fencing, fencing works and vehicle movements were underway.
- Godington where site access road construction, topsoil stripping and vegetation clearance were underway.
- Charndon Lodge Pumping Station where excavation and utility works were underway.
- Infrastructure Maintenance Depot (IMD) where watercourse diversion, bulk earthworks and drainage installation were underway.
- MCJ where de-vegetation, drainage works, culver installation and earthworks were underway.
- Bat Mitigation Structure where reinforced concrete works and technical backfill were underway.
- Sheephouse Wood North Culvert where backfilling was underway.
- SLC13 where reinforced concrete works, piling and earthworks were underway.
- GUN28 overbridge where deck and diaphragm works were underway.
- QUA36 overbridge where pile cap backfilling was underway.
- Doddershall Culverts where culvert unit installation, reinforced concrete works, technical backfill and construction of concrete protection slab were underway.

- QUA26 Underbridge where wall installation and reinforced concrete works were underway.
- QUA28 Overbridge where reinforced concrete works, pile cap installation, waterproofing and backfilling were underway.
- Station Road Overbridge where reinforced concrete works, abutment pile cap pours construction of tensar wall, investigation and monitoring installation and utility works were underway.
- Hills Farm where stockpiling was underway.
- Culvert No.16 where chamber installation was underway.
- Culvert No.12 where waterproofing and backfilling were underway.
- Fleet Marston where earthworks, culvert and overbridge works were underway.
- Along A41 where concrete batching plant operation, earthworks, vehicle restraint system installation, highway construction, kerbing, pavement construction, signage installation and drainage works were underway.
- Westfield where excavation including pond excavation was underway.
- Meadoway where utility installation and road resurfacing were underway.
- Bowood Lane where installation of parapets, reinforced bars and shutters were underway.
- Nash Lee Road Diversion where temporary surface water management was underway.

The HS2 threshold levels for significant noise impacts, which are defined in Information Paper E23 (https://www.gov.uk/government/publications/hs2-information-papers-environment), were exceeded six (6) times during the reporting period.

One (1) exceedance of trigger levels as defined in Section 61 consents occurred during the reporting period.

Three (3) complaints were received within the Buckinghamshire area during the monitoring period. A description of the complaints, the results of investigations and any actions taken are detailed in Table 8 of this report.

Abbreviations and Descriptions

The abbreviations, descriptions and project terminology used within this report can be found in Table 1.

Table 1: Table of Abbreviations

Acronym/Term	Definition
$L_{Aeq,T}$	See equivalent continuous sound pressure level
Ambient sound	A description of the all-encompassing sound at a given location and time which will include sound from many sources near and far. Ambient sound can be quantified in terms of the equivalent continuous sound pressure level, $L_{pAeq,T}$
Decibel(s), or dB	Between the quietest audible sound and the loudest tolerable sound there is a million to one ratio in sound pressure (measured in Pascal (Pa)). Because of this wide range, a level scale called the decibel (dB) scale, based on a logarithmic ratio, is used in sound measurement. Audibility of sound covers a range of approximately 0-140dB.
Decibel(s) A-weighted, or dB(A)	The human ear system does not respond uniformly to sound across the detectable frequency range and consequently instrumentation used to measure sound is weighted to represent the performance of the ear. This is known as the 'A weighting' and is written as 'dB(A)'.
Equivalent continuous sound pressure level, or $L_{Aeq,T}$	An index used internationally for the assessment of environmental sound impacts. It is defined as the notional unchanging level that would, over a given period of time (T), deliver the same sound energy as the actual time-varying sound over the same period. Hence fluctuating sound levels can be described in terms of an equivalent single figure value, typically expressed as a decibel level.
Exclusion of data	Measurement of noise levels can be affected by weather conditions such as prolonged periods of rain, winds speeds higher than 5m/s and snow/ice ground cover. Noise levels measured during these periods are considered not representative of normal noise conditions at the site and, for the purposes of this report, are excluded from the assessment of exceedances and calculation of typical noise levels and are also greyed out in charts. Identifiable incongruous noise and vibration events not attributable to HS2 construction noise are also excluded.
Façade	A facade noise level is the noise level 1m in front of a large reflecting surface. The effect of reflection, is to produce a slightly higher (typically +3 dB) sound level than it would be if the reflecting surface was not there.
Free-field	A free-field noise level is the noise level measured at a location where no reflective surfaces, other than the ground, lies within 3.5 metres of the microphone position.
LOAEL	Lowest Observed Adverse Effect Level – the level above which adverse effects on health and quality of life can be detected.
Peak particle velocity, or PPV	Instantaneous maximum velocity reached by a vibrating element as it oscillates about its rest position. The PPV is a simple indicator of perceptibility and risk of damage to structures due to vibration. It is usually measured in mm/s.
SOAEL	Significant Observed Adverse Effect Level – the level above which significant adverse effects on health and quality of life occur.
Sound pressure level	The parameter by which sound levels are measured in air. It is measured in decibels. The threshold of hearing has been set at 0dB, while the threshold of pain is approximately 120dB. Normal speech is approximately 60dB at a distance of 1 metre and a change of 3dB in a time varying sound signal is commonly regarded as being just detectable. A change of 10dB is subjectively twice, or half, as loud.
Vibration dose value, or VDV	An index used to evaluate human exposure to vibration in buildings. While the PPV provides information regarding the magnitude of single vibration events, the VDV provides a measure of the total vibration experienced over a specified period of time (typically 16h daytime and 8h night-time). It takes into account the magnitude, the number and the duration of vibration events and can be used to quantify exposure to continuous, impulsive, occasional and intermittent vibration. The vibration dose value is measured in $m/s^{1.75}$.

1 Introduction

1.1.1 HS2 is required to undertake noise (and vibration) monitoring as necessary to comply with the requirements of the High Speed Rail (London-West Midlands) Environmental Minimum Requirements, including specifically Annex 1: Code of Construction Practice, in addition to any monitoring requirements arising from conditions imposed through consents under Section 61 of the Control of Pollution Act, 1974 or through Undertakings & Assurances given to third parties. Such monitoring may be undertaken for the following purposes:

- monitoring the impact of construction works;
- to investigate complaints, incidents and exceedance of trigger levels; or
- monitoring the effectiveness of noise and vibration control measures.

1.1.2 Monitoring data and interpretive reports are to be provided to each relevant local authority on a monthly basis and shall include a summary of the construction activities occurring, the data recorded over the monitoring period, any complaints received, any periods in exceedance of agreed trigger levels, the results of any investigations and any actions taken or mitigation measures implemented. This report provides noise data, and interpretation thereof, for monitoring carried out by HS2 within the Buckinghamshire (BS) Local Authority area for the period 1st to 31st December 2024.

1.1.3 Active construction sites in the local authority area where monitoring was undertaken during this period include:

- A422 Turweston North worksite, ref.: A422 TN (see Plan 1 in Appendix A), where works activities included:
    - Viaduct construction, including construction of retaining wall and girder assembly.
    - Overbridge construction, including steel fixing and beam installation.
    - Excavation.
    - Drainage works, including drain construction.
    - Material movements.
- School End worksite, ref.: SE (see Plan 2 in Appendix A) and Hermitage Chetwode Worksite ref.: HC (see plan 2 in Appendix A), where works activities included:
    - Overbridge construction, including deck works, steel fixing, formwork, slab construction and lifting of paratops.

    - Highway works, including installation of temporary signage and utility duct installation.
    - Water management.
    - Haul and site access road maintenance.
- Twyford worksite, ref.: TW (see Plan 2 in Appendix A), where works activities included:
    - Viaduct works, including sheet piling and backfilling.
    - Water management.
    - Haul and site access road maintenance.
- West Street Overbridge worksite, ref.: WSO (see Plan 2 in Appendix A), where works activities included:
    - Grouting.
    - Wingwall construction and reinforced bar fixing.
    - Pannel installation.
    - Drainage works.
    - Road works, including curbing.
    - Waterproofing.
    - Bulk earthworks.
    - Technical backfill.
- Calvert worksite, ref.: CAL (see Plan 3 in Appendix A) where works activities included:
    - Reinforced concrete works.
    - Production of concrete.
    - Material movements.
    - Earthworks.
    - Drainage works.
- Woodlands worksite, ref.: WDL (see Plan 4 in Appendix A) where works activities included:
    - Concrete repairs.
    - Material movements.

    - Dig and replace.
- Quainton worksite, ref.: QAR (see Plan 4 in Appendix A) where works activities included:
    - Ditch crossing construction.
    - Utility works.
    - Site access road construction.
- Oat Close worksite, ref.: OC (see Plan 6 in Appendix A), where works activities included:
    - Overbridge works, including reinforced concrete works and beam installation.
    - Excavation.
    - Stockpiling.
- Waddesdon worksite, ref.: WAD (see Plan 5 in Appendix A), where works activities included:
    - Culvert construction.
    - Utility diversion.
    - Earthworks.
- Thames Valley Viaduct worksite, ref.: TVV (see Plan 5 in Appendix A), where works activities included:
    - Formwork installation.
    - Lifting of beams.
- Risborough Road worksite, ref.: RR (see Plan 6 in Appendix A), where works activities included:
    - Road construction.
    - Utility diversion.
- Aylesbury Gold Course worksite, ref.: GC (see Plan 6 in Appendix A), where works activities included:
    - Cutting.
    - Culvert construction.
    - Utility diversions.

- Nash Lee Lane worksite, ref.: NLL (see Plan 6 in Appendix A), where works activities included: Your location
    - Abutment works, including concrete pours and erection of steel and shutters.
    - Shutter installation.
    - Utility diversions.
    - Installation of control points.
    - Temporary surface water management.
- Wendover Green Tunnel worksite, ref.: WGT (see Plan 7 in Appendix A), where works activities included:
    - Tunnelling works, including grouting, excavation, steel works and reinforced concrete works.
    - Road works, including installation of fencing, bunds and signage posts.
    - Utility works, including pipe connections.
    - Excavation.
    - Protection slab construction.
    - Installation and removal of shutters.
    - Material movements and deliveries.
    - Backfilling.
    - Pre-treatment works, including relocation of compound.
    - Stoning.
    - Vegetation clearance.
- Grove Farm worksite, ref.: GF (see Plan 7 in Appendix A), where works activities included:
    - Piling.
    - Demobilisation.
    - Compound construction.
    - Ground investigation works.
- Small Dean Viaduct Compound worksite, ref.: SDVC (see Plan 7 in Appendix A), where works activities included:

- Precast installation.
- Installation of neoprene, sealant and backer rod.
- Reinforced bar installation and prefabrication.
- Bearing works, including plinth pour and plate grouting.
- Scaffold building.
- Backfilling.
- Sheet pile cutting.
- Lowering of viaduct.
- Welding.
- Installation of generators and associated equipment.

- Rocky Lane Embankment worksite, ref.: RLE (see Plan 7 in Appendix A), where works activities included:
  - Deck false-work erection.
  - Reinforced bar fixing.
  - Road maintenance and realignment, including drainage and installation of capping layers.
  - Temporary surface water management.
- Wendover Dean Viaduct worksite, ref.: WDV (see Plan 7 in Appendix A), where works activities included:
  - Welding.
  - Bearing installation.
- Leather Lane worksite, ref.: LL (see Plan 8 in Appendix A), where works activities included:
  - Sheet piling.
  - Drainage preparation works.
  - Installation of drilling platforms.
- South Heath worksite, ref.: SH (see Plan 8 in Appendix A), where works activities included:
  - Earthworks.
  - Utility works, including drainage.

- General site activities.
- Culvert works.
- Overbridge construction.
- Ground investigation works.
- Site access and haul road construction and operation.

- North Portal worksite, ref.: NP (see Plan 8 in Appendix A), where works activities included:
  - Operation of site plant.
  - Platform construction.
  - Piling platform reinstatement.
  - Porous portal structure works.
  - Building construction.
  - Batching plant operation and distribution of material.
  - Tunnel walkway slip forming.
  - Utilities works, including drainage.
- Chesham Road worksite, ref.: CHSM (see Plan 8 in Appendix A), where works activities included:
  - General site activities.
  - Internal and external building works, including cladding works.
  - Demobilisation.
  - Landscaping.
- Little Missenden Vent Shaft worksite ref.: LM (see Plan 9 in Appendix A), where works activities included:
  - General site activities including operation of plant.
  - Tunnel connection works.
  - Headhouse superstructure concrete works.
  - Building construction internal and external works.
- Amersham Vent Shaft worksite, ref.: AM (see Plan 10 in Appendix A), where works activities included:
  - General site activities including operation of plant.

- External and internal building works.
- Tunnel connection works.
- Superstructure concrete works.
- Pre-casting of boundary wall.
- Steel and cladding works.
- Mechanical plant works.

- Chalfont St Giles Vent Shaft worksite, ref.: CSG (see Plan 11 in Appendix A), where works activities included:
  - General site activities including operation of plant.
  - Road maintenance.
  - Internal and external building works.
  - Demobilisation.
- Chalfont St Peter Vent Shaft worksite, ref.: CSP (see Plan 12 in Appendix A), where works activities included:
  - Operation of plant.
  - Road maintenance.
  - Internal and external building works.
  - Demobilisation.
- Colne Valley Viaduct – Load Test Pile 1 worksite, which is partly located in the London Borough of Hillingdon (LBH), ref.: CVV (see Plan 13 in Appendix A), where works activities included:
  - Jetty and haul road operation and maintenance
  - Jetty removal, including excavation, backfill, landscaping, cutting piles and steel works.
  - Compound operations.
  - Ground investigation works.
  - Pumping water management.
  - Satellite compound welfare and generator farm operation.
  - Environmental maintenance.

- Deck finishes including preparation and operation of storage yards, installation of below deck access provision, traffic management on deck surface, installation of parapets, installation of noise barriers, troughs, pipes, steel works and other minor materials to the storage yards and deck, installation of stairs, operation of support plant, construction of kerbs, construction of concrete stitch, filling of voids and top openings, waterproofing, diaphragm walls construction, abutment works, concrete works (within deck), drainage and steel works.
- Landscaping works including removal of cofferdams, earthworks, profiling and cutting, manhole chamber construction, drainage, soil placement and vegetation clearance.

1.1.4 Further works, where monitoring did not take place, were also undertaken at:

- Grovill Embankment (Westbury) where excavation and replace was underway.
- School End North where bulk excavation, vegetation clearance, stockpiling, drainage, pond maintenance and excavation, removal of badger fencing, fencing works and vehicle movements were underway.
- Godington where site access road construction, topsoil stripping and vegetation clearance were underway.
- Charndon Lodge Pumping Station where excavation and utility works were underway.
- Infrastructure Maintenance Depot (IMD) where watercourse diversion, bulk earthworks and drainage installation were underway.
- MCJ where de-vegetation, drainage works, culver installation and earthworks were underway.
- Bat Mitigation Structure where reinforced concrete works and technical backfill were underway.
- Sheephouse Wood North Culvert where backfilling was underway.
- SLC13 where reinforced concrete works, piling and earthworks were underway.
- GUN28 overbridge where deck and diaphragm works were underway.
- QUA36 overbridge where pile cap backfilling was underway.
- Doddershall Culverts where culvert unit installation, reinforced concrete works, technical backfill and construction of concrete protection slab were underway.
- QUA26 Underbridge where wall installation and reinforced concrete works were underway.

- QUA28 Overbridge where reinforced concrete works, pile cap installation, waterproofing and backfilling were underway.
- Station Road Overbridge where reinforced concrete works, abutment pile cap pours, construction of tensar wall, investigation and monitoring installation and utility works were underway.
- Hills Farm where stockpiling was underway.
- Culvert No.16 where chamber installation was underway.
- Culvert No.12 where waterproofing and backfilling were underway.
- Fleet Marston where earthworks, culvert and overbridge works were underway.
- Along A41 where concrete batching plant operation, earthworks, vehicle restraint system installation, highway construction, kerbing, pavement construction, signage installation and drainage works were underway.
- Westfield where excavation including pond excavation was underway.
- Meadoway where utility installation and road resurfacing were underway.
- Bowood Lane where installation of parapets, reinforced bars and shutters were underway.
- Nash Lee Road Diversion where temporary surface water management was underway.

1.1.5 The applicable standards, guidance, and monitoring methodology are outlined in the construction noise and vibration monitoring methodology report which can be found at the following location https://www.gov.uk/government/collections/monitoring-the-environmental-effects-of-hs2. Noise and vibration monitoring reports for previous months can also be found at this location.

1.2 Measurement Locations

1.2.1 Forty-one (41) noise and seven (7) vibration monitoring installations were active in December in the BS area. Table 2 summarises the location of noise and vibration monitoring installations within the BS area in December 2024.

1.2.2 Vibration monitor GD-Vib1 within the vicinity of Leather Lane worksite, ref.: LL, was decommissioned on Wednesday 18th December.

1.2.3 Maps showing the positions of noise and vibration monitoring installations are presented in Appendix B.

Table 2: Monitoring Locations

Worksite Reference	Measurement Reference	Address
A422 TN	TN-NMP1	Turweston, Brackley

	CSP-NMP2	Chalfont St Peter Vent Shaft Worksite, Chesham Lane, Chalfont St. Peter
CVV*	CVV-NMP1	Northern boundary, Load Test Pile 1 Worksite, Denham Water Ski Club

* This worksite is within the London Borough of Hillingdon, for more details on the works taking place please refer to the London Borough of Hillingdon Noise and Vibration Report available at: https://www.gov.uk/government/collections/monitoring-the-environmental-effects-of-hs2

2 Summary of Results

2.1 Summary of Measured Noise Levels

2.1.1 Table 3 presents a summary of the measured noise levels at each monitoring location over the reporting period. The $L_{Aeq,T}$ is presented for each of the relevant time periods averaged over the calendar month, along with the highest single period $L_{Aeq,T}$ that was found to occur within the month.

Table 3: Summary of Measured dB L_{Aeq} Data over the Monitoring Period

Worksite Reference	Measurement Reference	Site Address	Free-Field or Façade Measurement	Weekday Average LAeq,T (Highest Day LAeq,T)					Saturday Average LAeq,T (Highest Day LAeq,T)					Sunday / Public Holiday Average LAeq,T (Highest Day LAeq,T)	
				0700 - 0800	0800 - 1800	1800 - 1900	1900 - 2200	2200 - 0700	0700 - 0800	0800 - 1300	1300 - 1400	1400 - 2200	2200 - 0700	0700 - 2200	2200 - 0700

*Missing data at noise monitor WAD-NMP2 was due to a fault with the monitor solar enclosure. Noise monitor ER-NMP1 was retrieved for repair on Thursday 12th December. Missing data at noise monitor WDV-NMP1 was due to a fault with the monitoring station. Missing data at CSP-NMP2 was due to depleted batteries at the monitoring station.

2.1.2 Table 4 presents a summary of the measured vibration levels at the monitoring location over the reporting period. The highest PPV measured during the monitoring along any axis is presented in the table.

Table 4: Summary of Measured PPV Data over the Monitoring Period

Worksite Reference	Measurement Reference	Monitor Address	Highest PPV measured in any axis, mm/s
SE	SE-Vib1	School End, Chetwode	2.19 (X-axis)
WDL	WDL-Vib1	Station Road, Quainton	0.91 (Z-axis)
CAL	BRA-Vib1	13 Brackley Lane, Calvert Village	1.70 (Y-axis)
WSO	PF-Vib1	Twyford, Buckinghamshire	1.67 (Y-axis)
WGT	ER-Vib1	46, Ellesborough Rd, Wendover	2.93 (Y-axis)
GF	GF-Vib1	Grove Farm, Wendover	1.23 (Y-axis)
RLE	GD-Vib1	Grimms Ditch	0.49 (Y-axis)

2.1.3 Appendix C presents graphs of the noise and vibration monitoring data over the month for each of the measurement locations. Noise data presented consists of the hourly L_{Aeq} values and, where relevant, the $L_{Aeq,T}$ values (where the time period T has been taken to be the averaging period as specified in Table 1 of HS2 Information Paper E23). Vibration data presented consist of hourly PPV values. The full data set for the monitoring equipment can be found at the following location: https://data.gov.uk/dataset/24542ae7-dd44-444f-b259-871c4cc43b5e/environmental-monitoring-data.

2.2 Exceedances of the LOAEL and SOAEL

2.2.1 The lowest observed adverse effect level (LOAEL) is defined in the Planning Practice Guidance – Noise (PPG) as the level above which "noise starts to cause small changes in behaviour and/or attitude, e.g. turning up volume of television; speaking more loudly; where there is no alternative ventilation, having to close windows for some of the time because of the noise. Potential for some reported sleep disturbance. Affects the acoustic character of the area such that there is a perceived change in the quality of life".

2.2.2 The significant observed adverse effect level (SOAEL) is defined in the 'Planning Practice Guidance – Noise' as the level above which "noise causes a material change in behaviour and/or attitude, e.g. avoiding certain activities during periods of intrusion; where there is no alternative ventilation, having to keep windows closed most of the time because of the noise. Potential for sleep disturbance resulting in

difficulty in getting to sleep, premature awakening and difficulty in getting back to sleep. Quality of life diminished due to change in acoustic character of the area.

2.2.3 HS2 Phase One Information Paper E23: Control of Construction Noise and Vibration sets out the LOAELs and SOAELs for construction noise.

2.2.4 Where reported construction noise levels exceed the LOAEL and SOAEL at nearby receptors, relevant periods will be identified. Summary statistics to evaluate ongoing qualification for noise insulation and temporary rehousing are also presented where relevant.

2.2.5 Table 5 presents a summary of recorded exceedances of the LOAEL and SOAEL over the reporting period, including the number of exceedances during each time period.

Table 5: Summary of Exceedances of LOAEL and SOAEL

Worksite Reference	Measurement Reference	Address	Day (Weekday, Saturday, Sunday, Night)	Time period	Number of exceedances of LOAEL	Number of exceedances of SOAEL

* The LOAEL or SOAEL has not been assessed due to high baseline levels.

** A distance correction has been applied when calculating exceedances of the LOAEL and SOAEL.

*** The LOAEL and SOAEL have not been assessed due to distance between monitoring station and nearest receptor.

2.2.6 Exceedances of the LOAEL were recorded at eleven (11) monitoring locations during the month of December 2024. LOAEL exceedances were recorded during weekday and Saturday daytime, evening and night working periods.

2.2.7 Exceedances of the SOAEL were recorded at two (2) monitoring locations during the month of December 2024. SOAEL exceedances were recorded during weekday and Saturday daytime and evening working periods.

2.2.8 For the purpose of reporting the number of days where the SOAEL is exceeded, multiple exceedances of the SOAEL in a 24-hour period would be counted as a single exceedance during that day. Over the reporting period, the overall number of SOAEL exceedances at each measurement location is shown in Table 6 and may be lower than the total sum of individual exceedances reported in Table 5 for each location.

Table 6: Summary of Total Exceedances of SOAEL

Worksite Reference	Measurement Reference	Monitor Address	Total of SOAEL exceedances in the month
WDL	WDL-NMP1	Woodlands Farmhouse, Station Rd, Quainton	5
LL	GD-NMP1	Grimms Ditch, The Lee, South Heath	1

2.2.9 Six (6) SOAEL exceedances were recorded due to HS2 construction works during December 2024.

2.3 Exceedances of Trigger Level

2.3.1 Table 7 provides a summary of exceedances of the S61 trigger noise levels determined to be due to HS2 related construction noise measured during the reporting period, along with the findings of any investigation.

Table 7: Summary of Exceedances of Trigger Levels

Complaint Reference Number (if applicable)	Worksite Reference	Date and Time Period	Identified Source	Results of Investigation (including noise monitoring results)	Actions Taken
-	GD	12/12/2024 22:00-07:00	Sheet piling from retaining wall.	78.6 dB $L_{Aeq,T}$	Site team were contacted regarding the exceedance. Investigation showed topography of area does not permit acoustic barrier installation. The nearby noise receptor did not complain about works. Vibration monitoring at receptor was ongoing for duration of works.

2.4 Complaints

2.4.1 Table 8 provides a summary of complaint information related to noise and vibration received during the reporting period, along with the findings of any investigation.

Table 8: Summary of Complaints

Complaint Reference Number	Worksite Reference	Description of Complaint	Results of Investigation	Actions Taken
HS2-24-116501-E-C	CSP	Disturbance due to loud drilling noise.	Investigation found no works were taking place at the time of the complaint.	Resident has been informed of the results of the investigation.
HS2-24-116477-E-C	CSP	Complaint regarding general site noise heard at night.	Noise was associated with the construction of the cross-passage walkways and the 'breaking out' of concrete. The works were consented by local authorities. All possible mitigation measures are in place and no exceedances were breached.	Resident has been informed of the results of the investigation.

Complaint Reference Number	Worksite Reference	Description of Complaint	Results of Investigation	Actions Taken
HS2-24-116580-E-C	WGT	Complaint due to angle grinder like noise heard at night.	Investigation found no HS2 works were taking place at the time of the complaint. However, a third party were working nearby on a newly realigned road.	Resident has been informed of the results of the investigation.

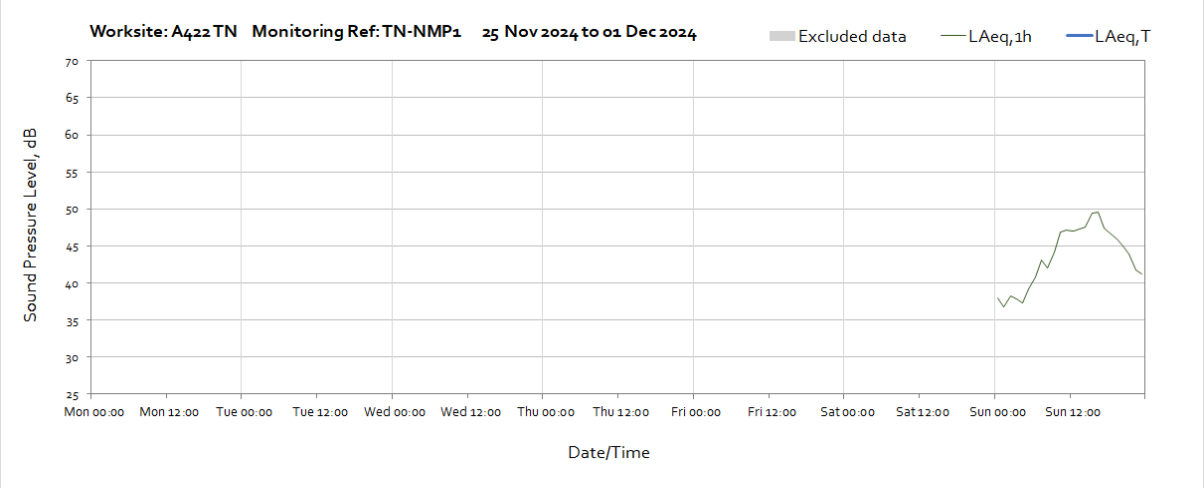
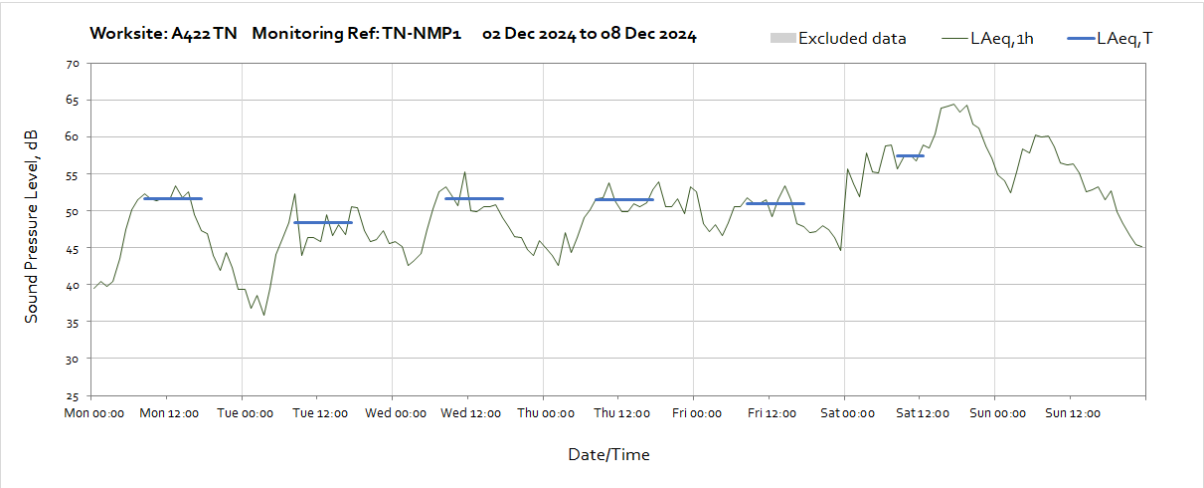
Appendix C Data

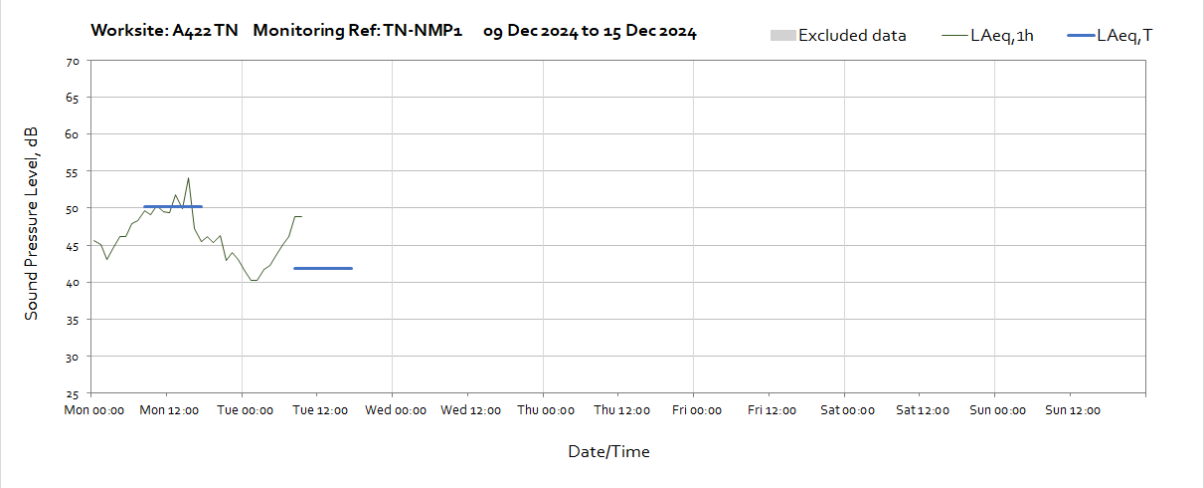
Noise

The following graphs show the hourly measured ambient noise level $L_{Aeq,1h}$ and, where relevant, the averaged noise level $L_{Aeq,T}$ values, where the time period T is as specified in Table 1 of HS2 Information Paper E23. Periods where noise levels are adversely affected by weather or only measured for part of the period, which are not representative of HS2 construction works, have been greyed out and excluded from the calculation of the $L_{Aeq,T}$ values in Table 3 of the main report.

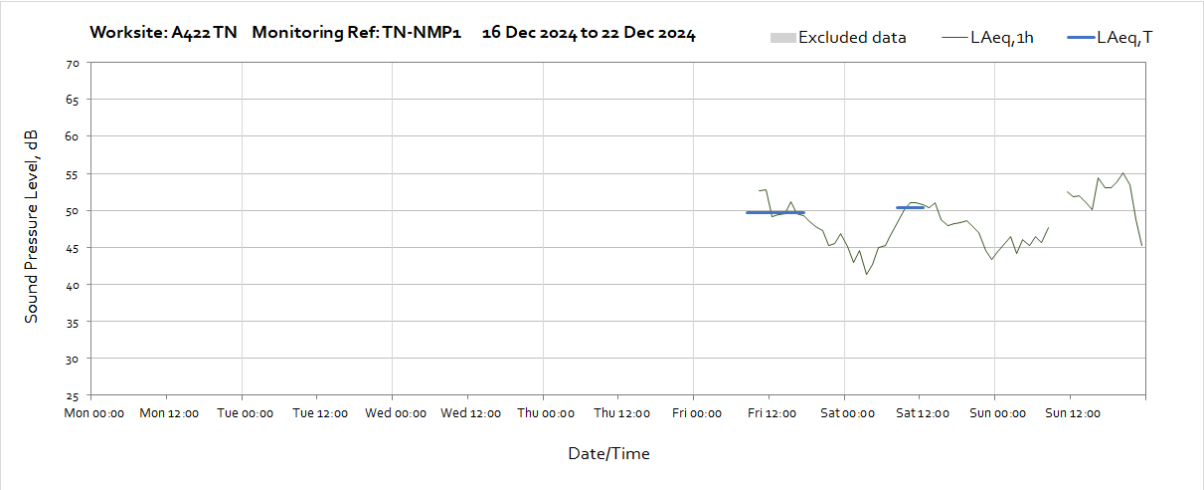
Worksite: A422 TN – Monitoring Ref: TN-NMP1



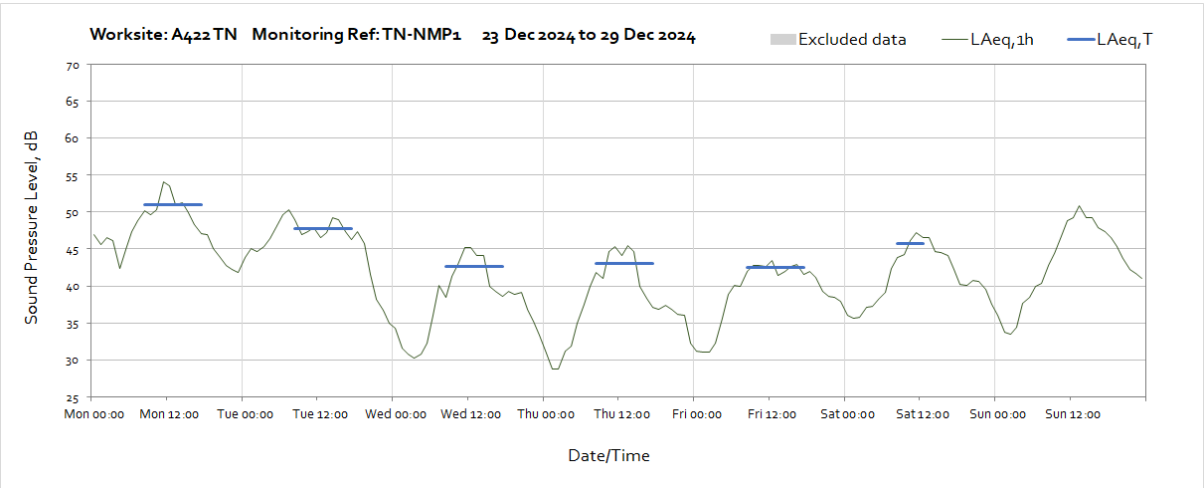


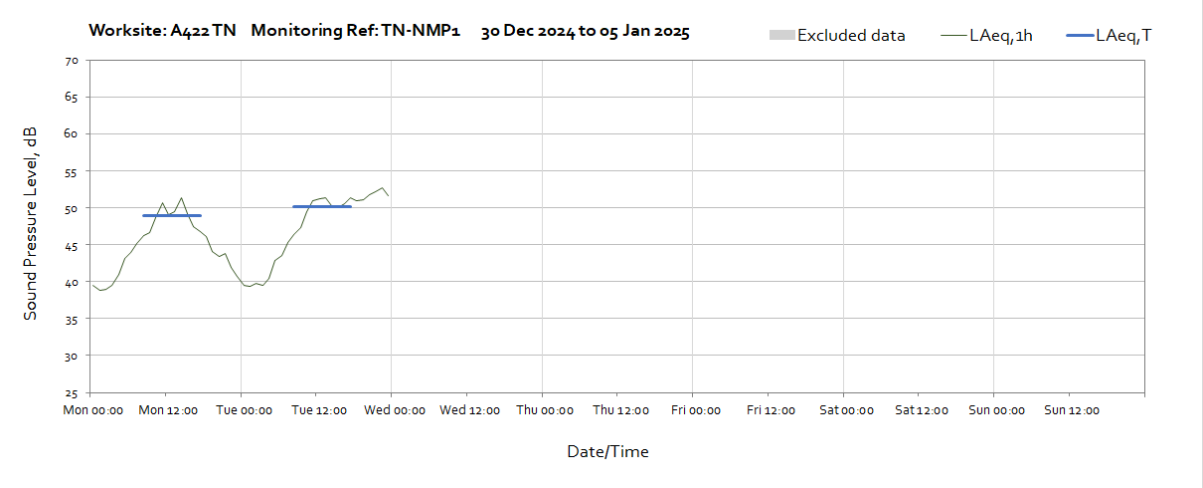


Note: Missing data between 10:00 on Tuesday 10th December and 10:00 on Friday 20th December was due to depleted monitor battery.

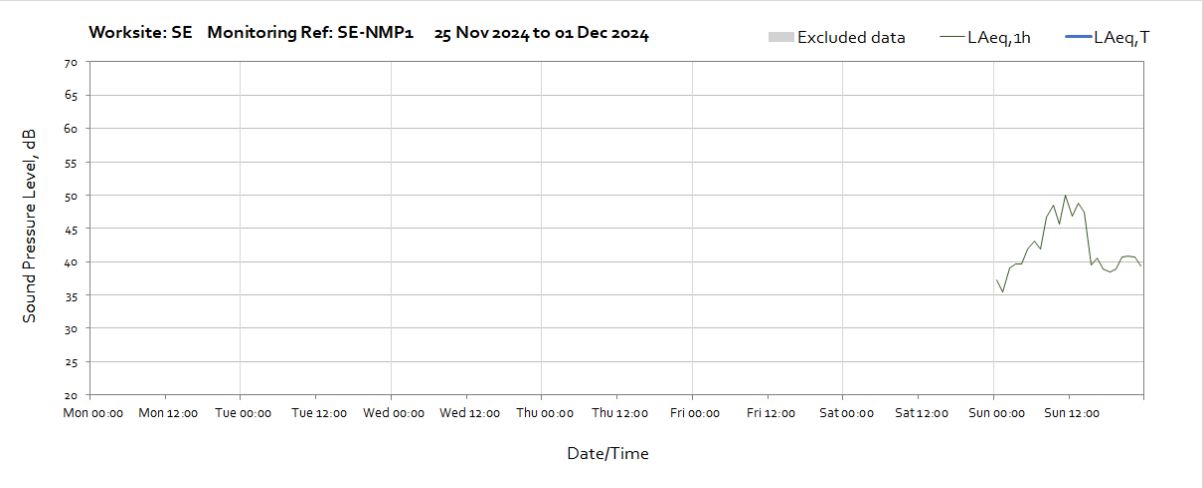


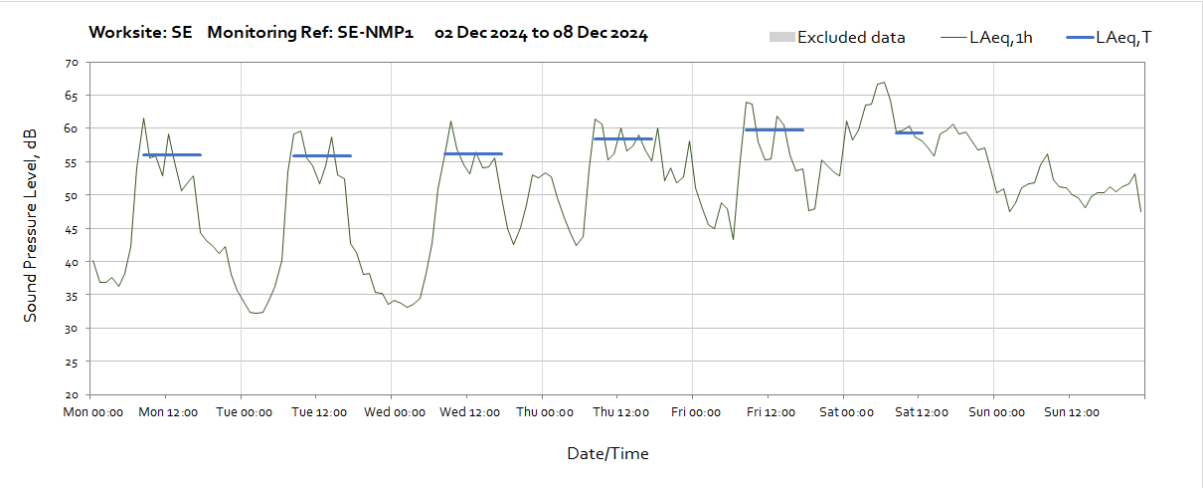
Note: Missing data between 10:00 on Tuesday 10th December and 10:00 on Friday 20th December was due to depleted monitor battery. Missing data between 09:00 and 11:00 on Sunday 22nd December was due to depleted monitor battery.

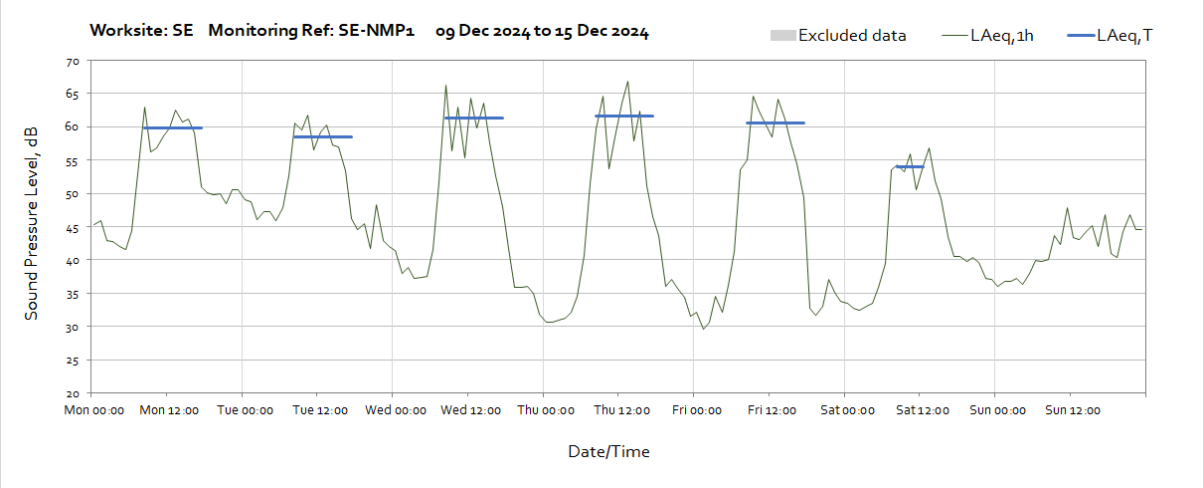


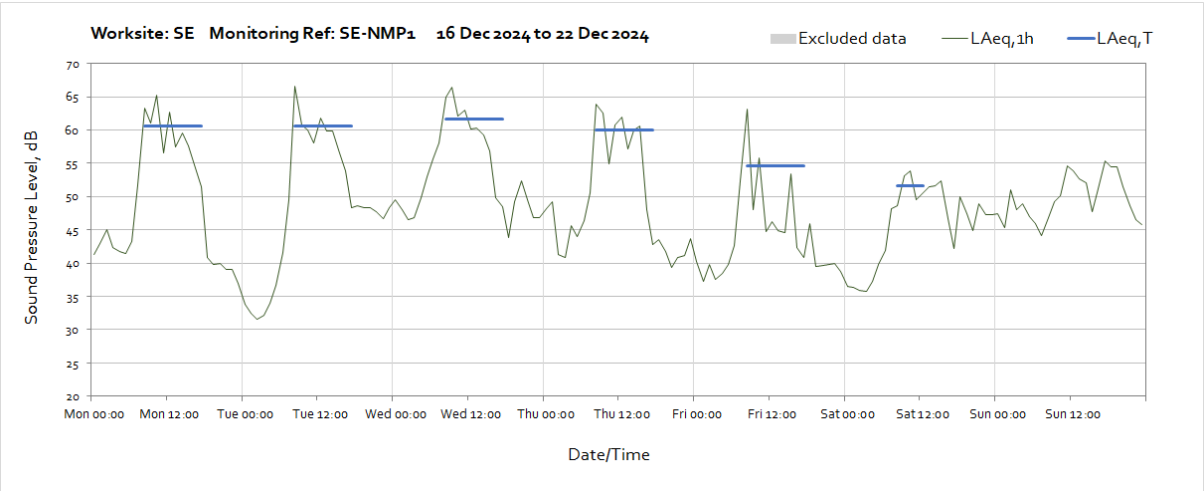


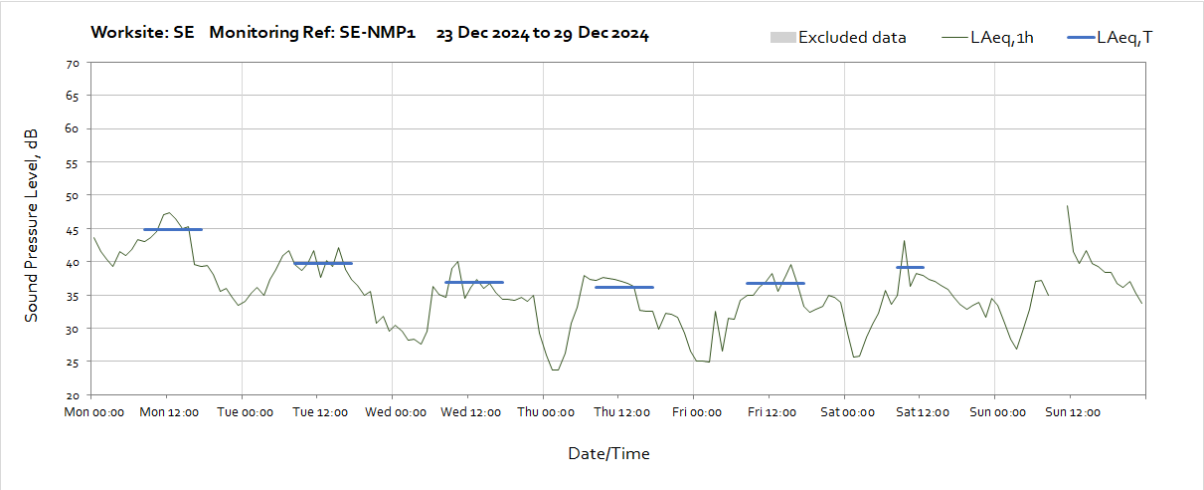
Worksite: SE – Monitoring Ref: SE-NMP1



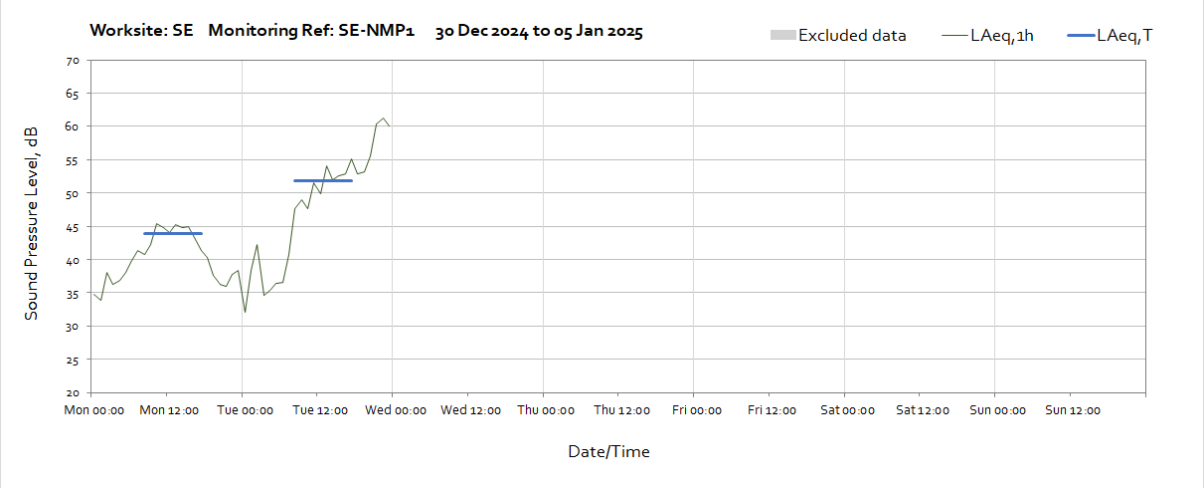




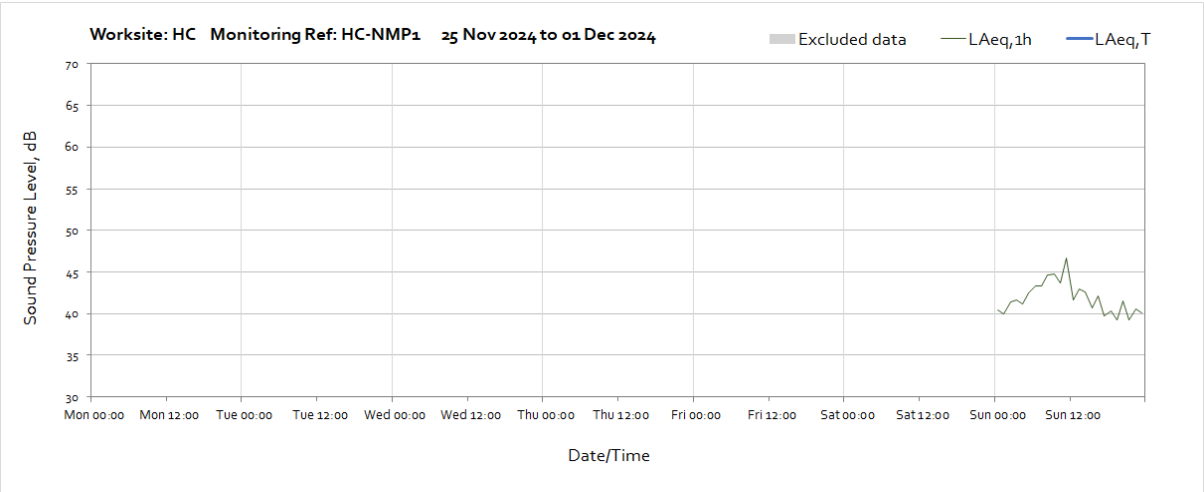


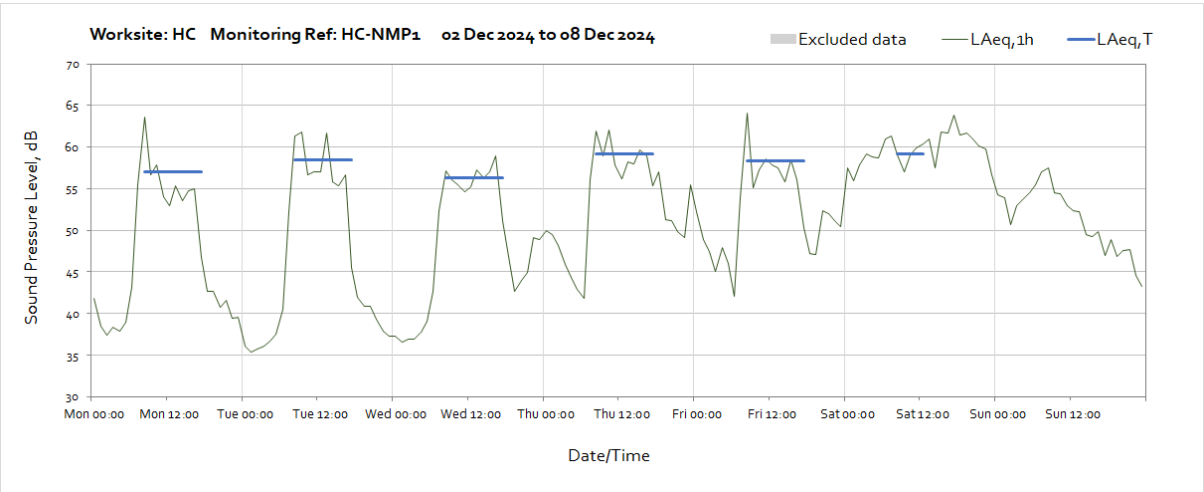


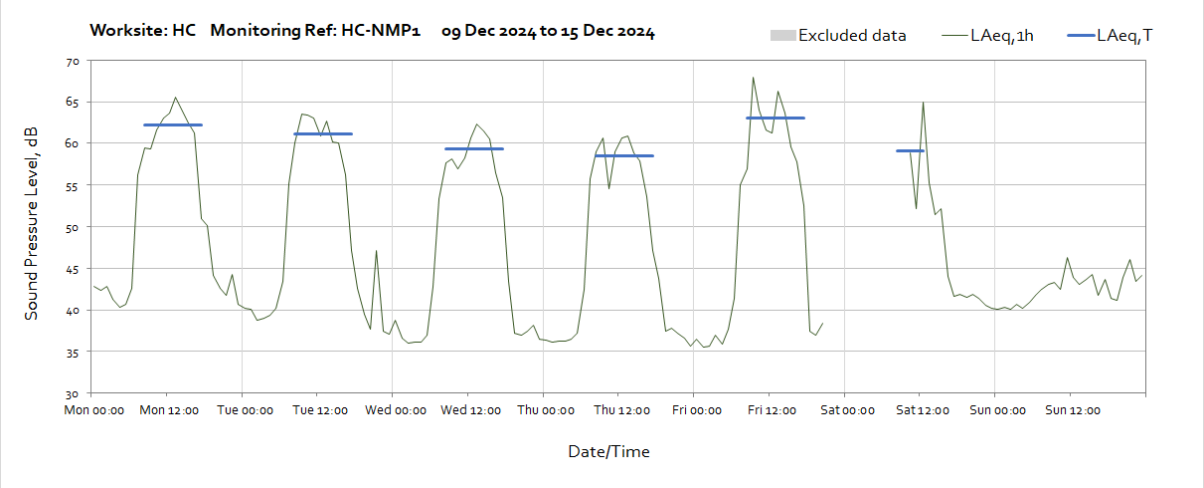
Note: Missing data between 09:00 and 11:00 on Sunday 29th December is currently under investigation.



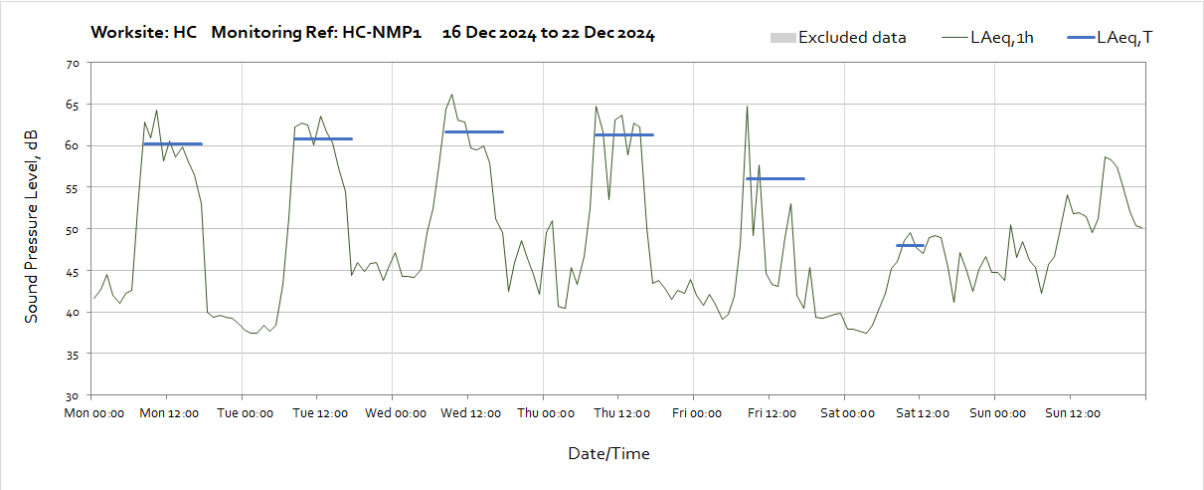
Worksite: HC – Monitoring Ref: HC-NMP1

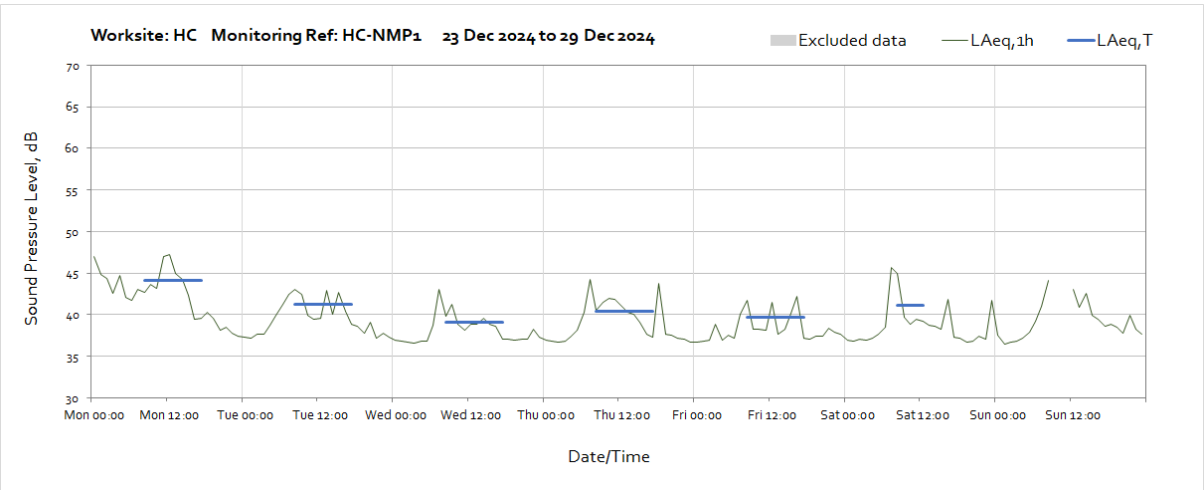




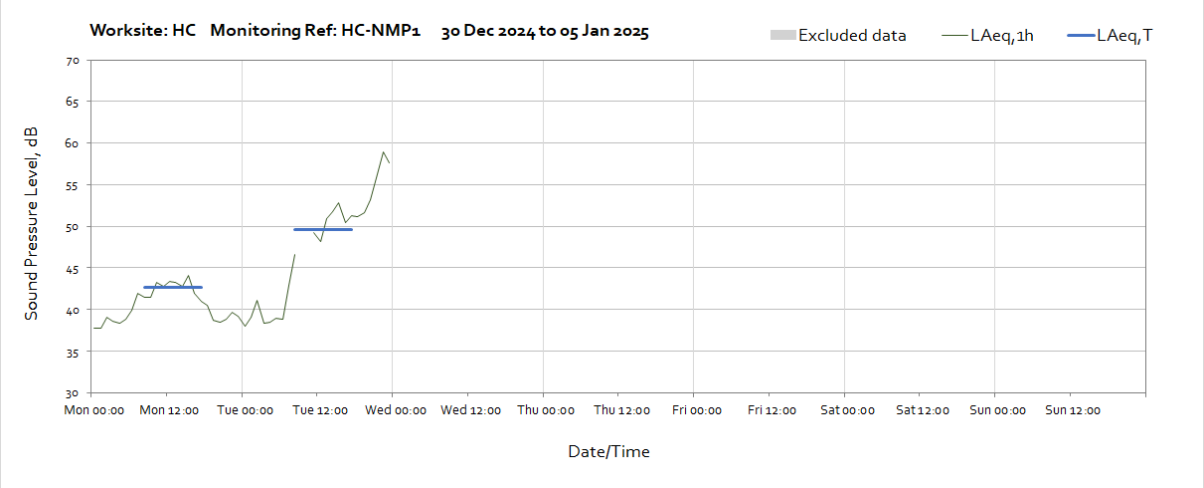


Note: Missing data between 21:00 on Friday 13th December and 10:00 on Saturday 14th December was due to depleted monitor battery.



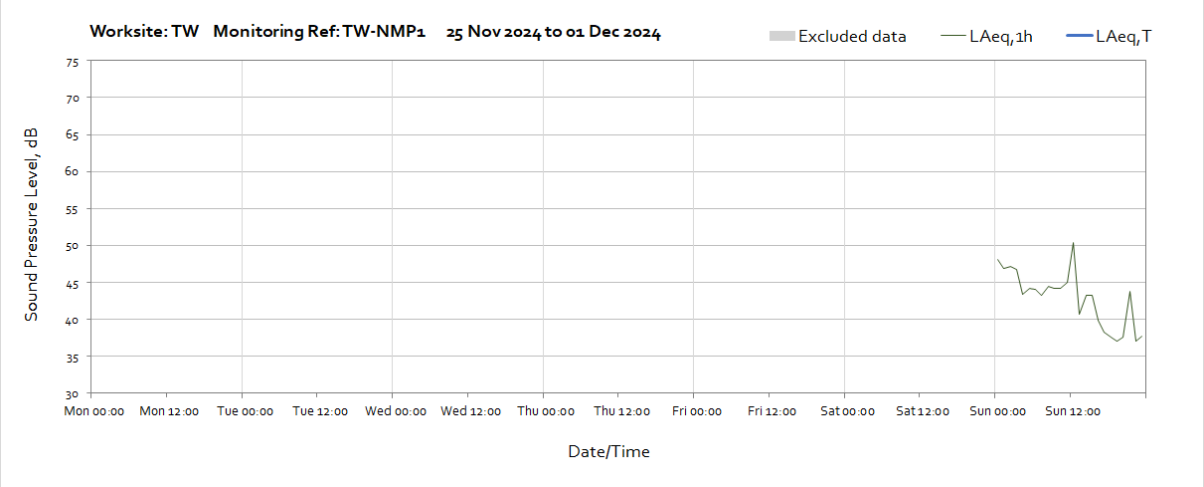


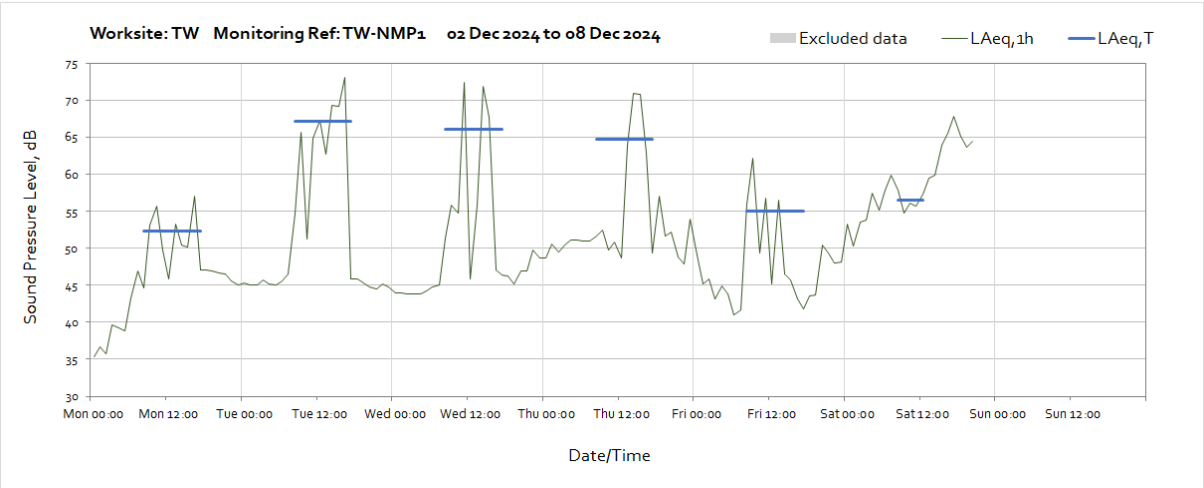
Note: Missing data between 09:00 and 12:00 on Sunday 29th December is currently under investigation.



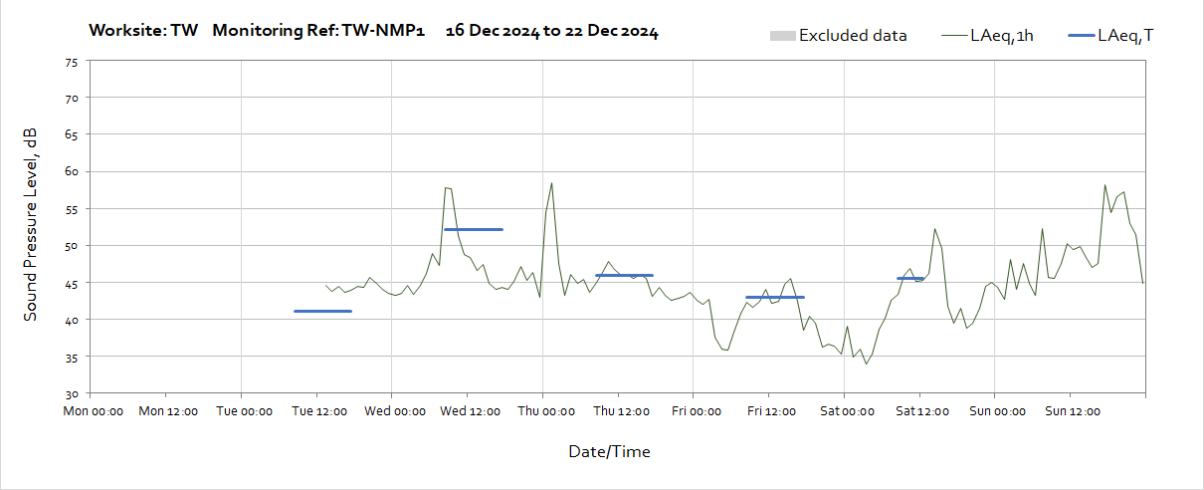
Note: Missing data between 09:00 and 11:00 on Tuesday 31st December is currently under investigation.

Worksite: TW – Monitoring Ref: TW-NMP1



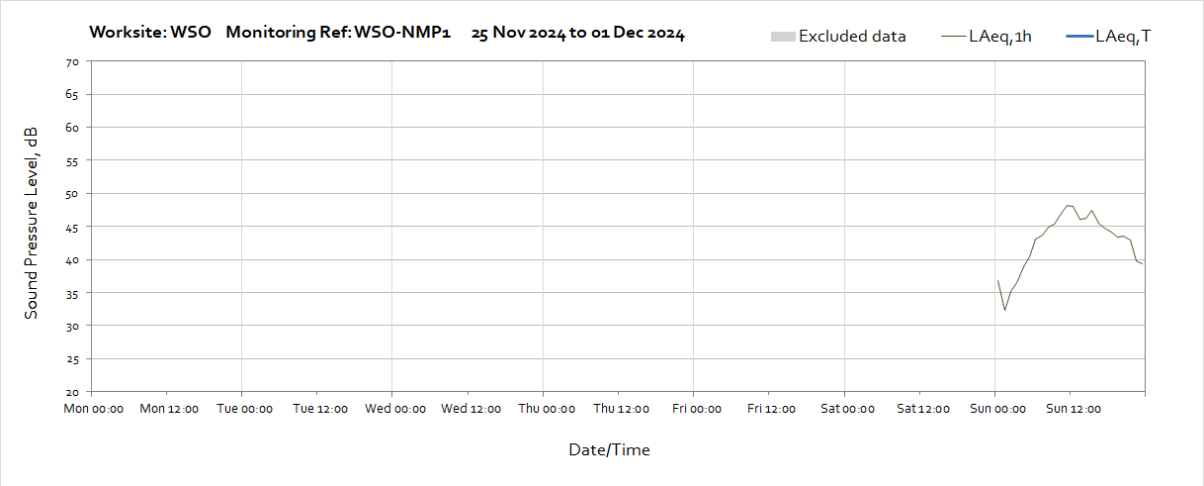


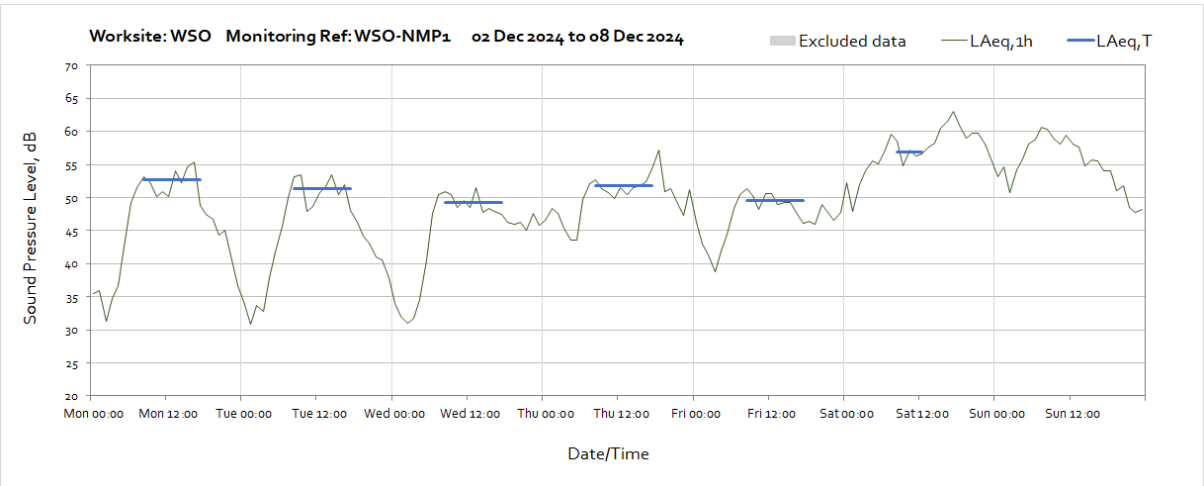
Note: Missing data between 21:00 on Saturday 7th December and 13:00 on Tuesday 17th December was due to depleted monitor battery.

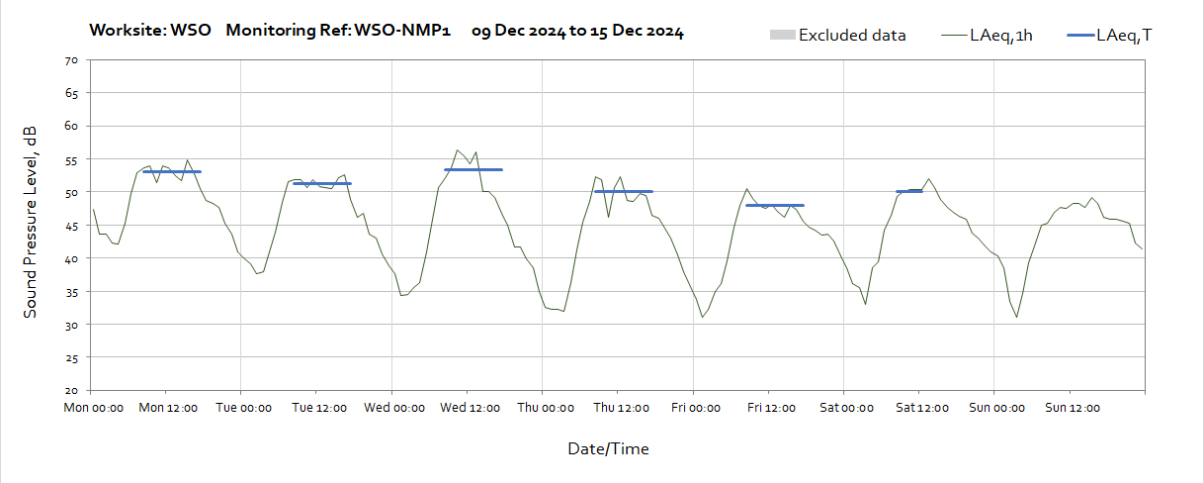


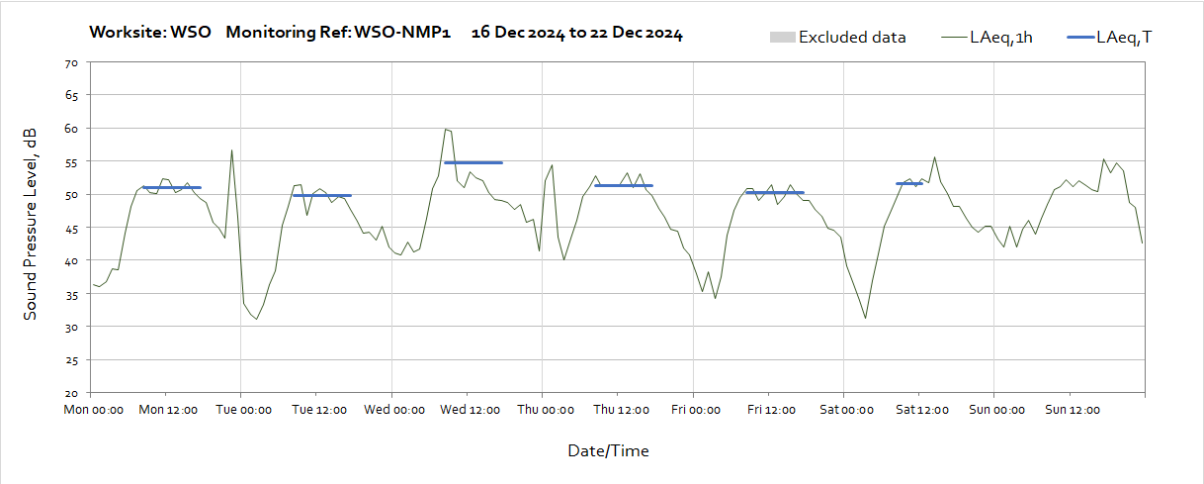
Note: Missing data between 21:00 on Saturday 7th December and 13:00 on Tuesday 17th December was due to depleted monitor battery. Missing data between 01:00 on Monday 23rd December and the end of the month was due to depleted monitor battery.

Worksite: WSO – Monitoring Ref: WSO-NMP1

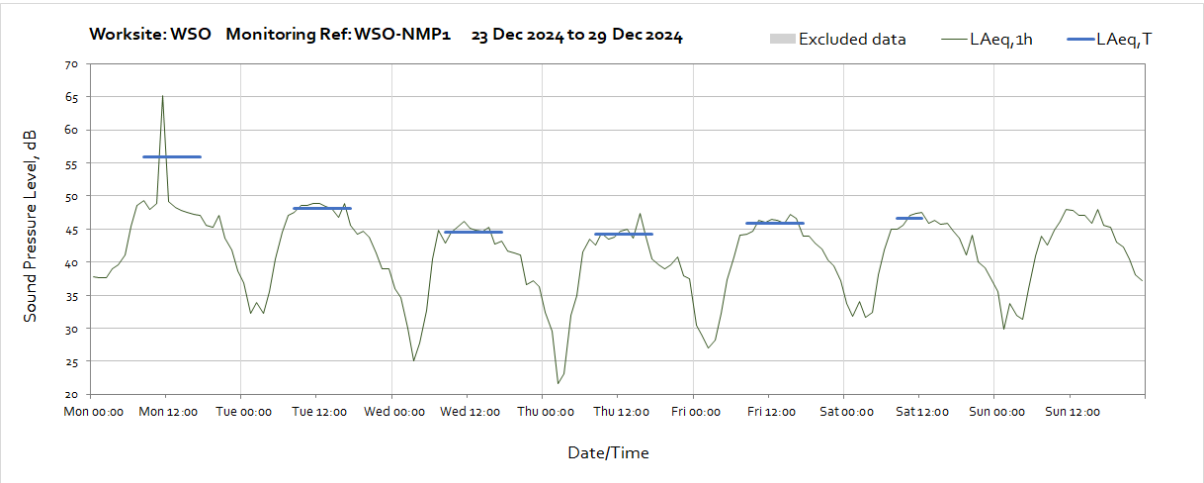


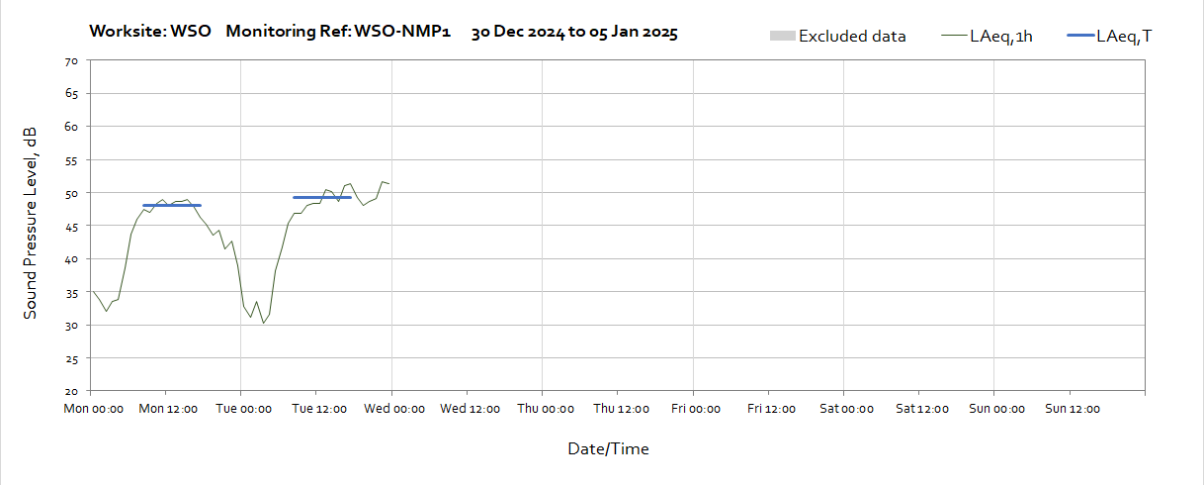




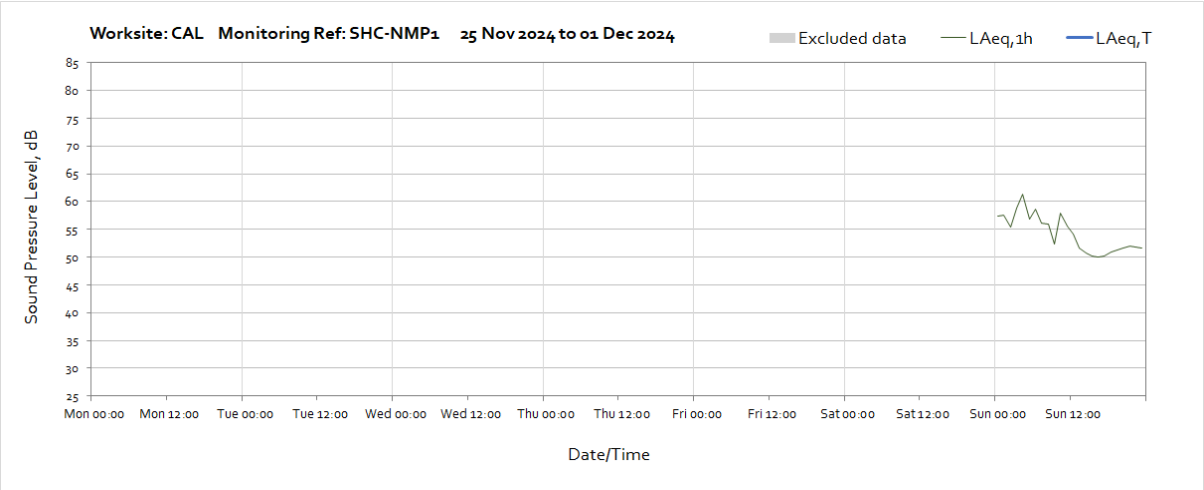


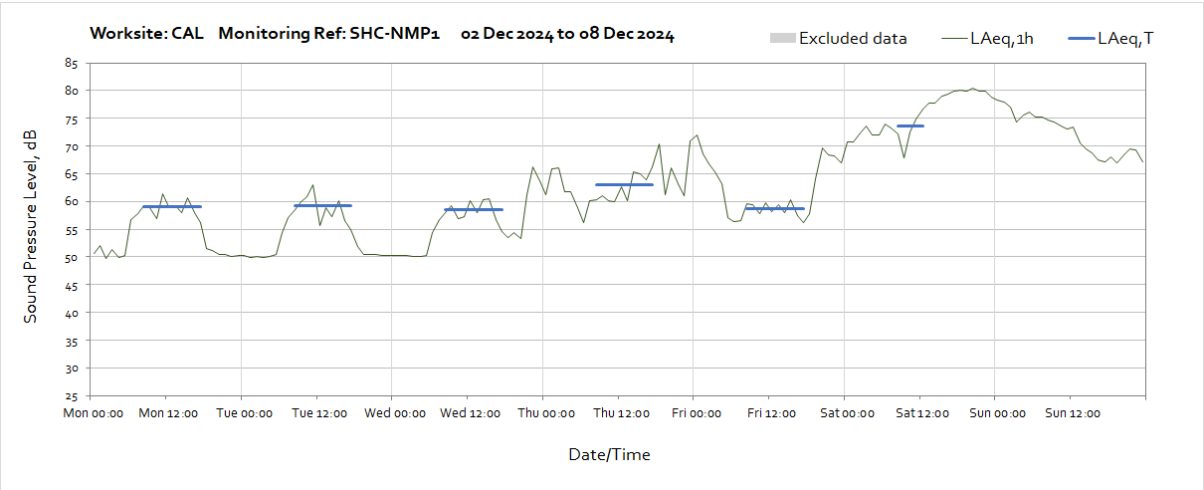
Note: Missing data between 11:00 and 12:00 on Thursday 19th December was due to field calibration.

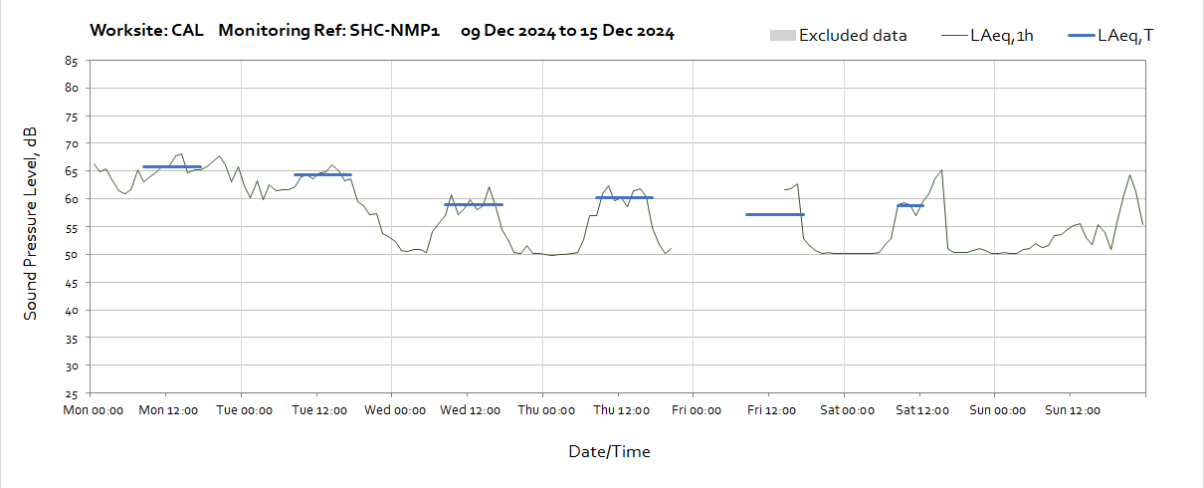




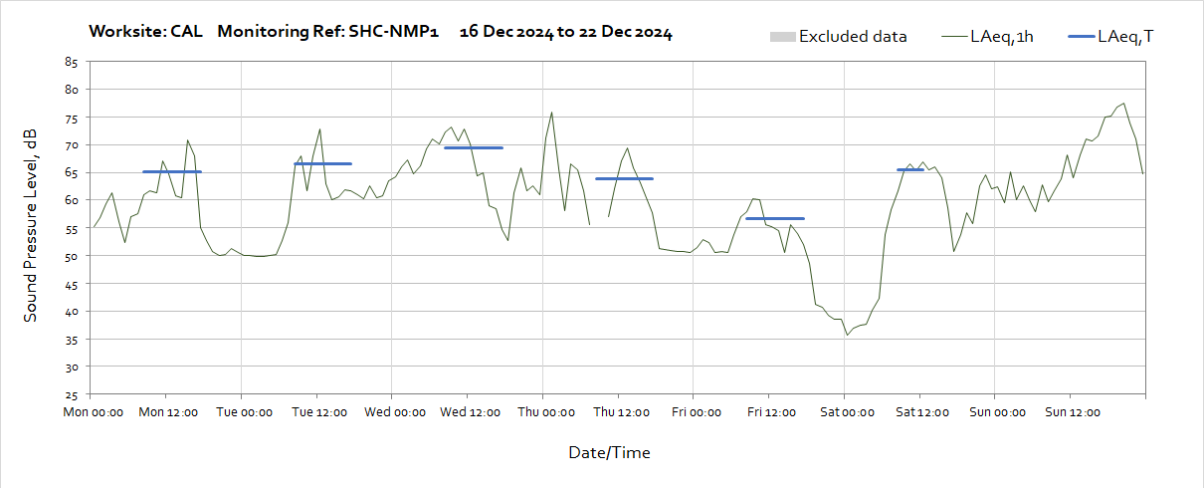
Worksite: CAL – Monitoring Ref: SHC-NMP1



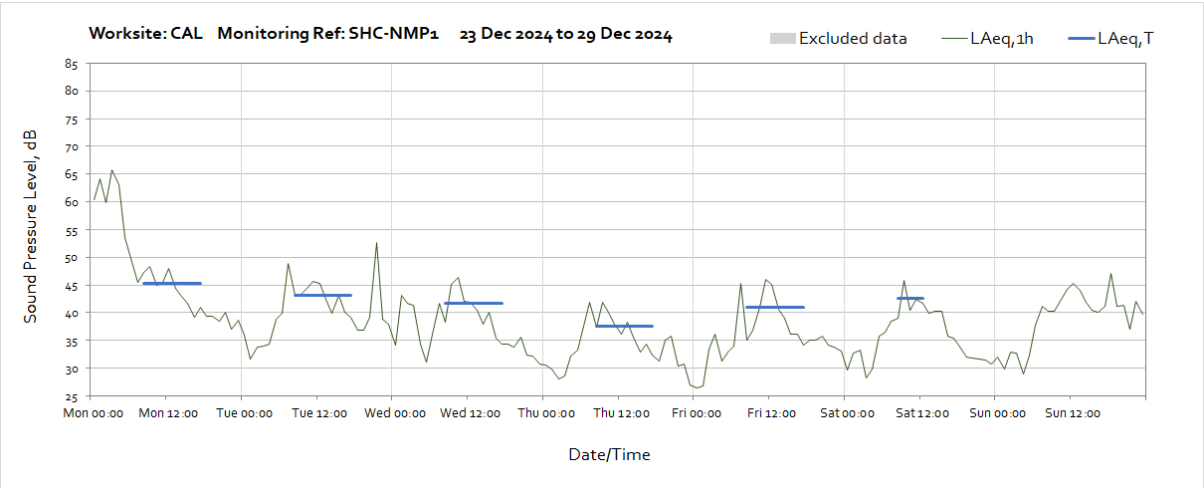


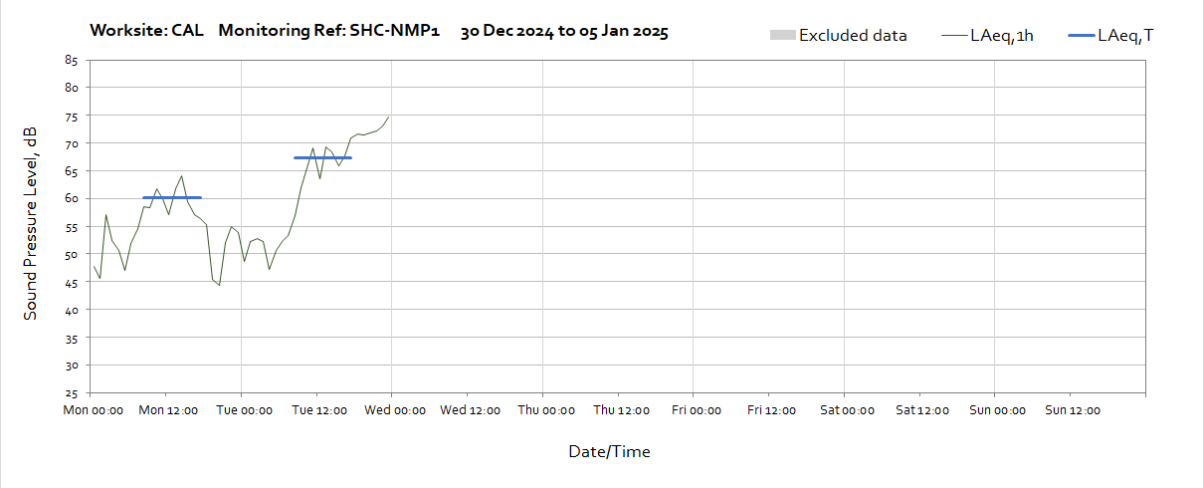


Note: Missing data between 21:00 on Thursday 12th December and 14:00 on Friday 13th December was due to a depleted monitor battery.

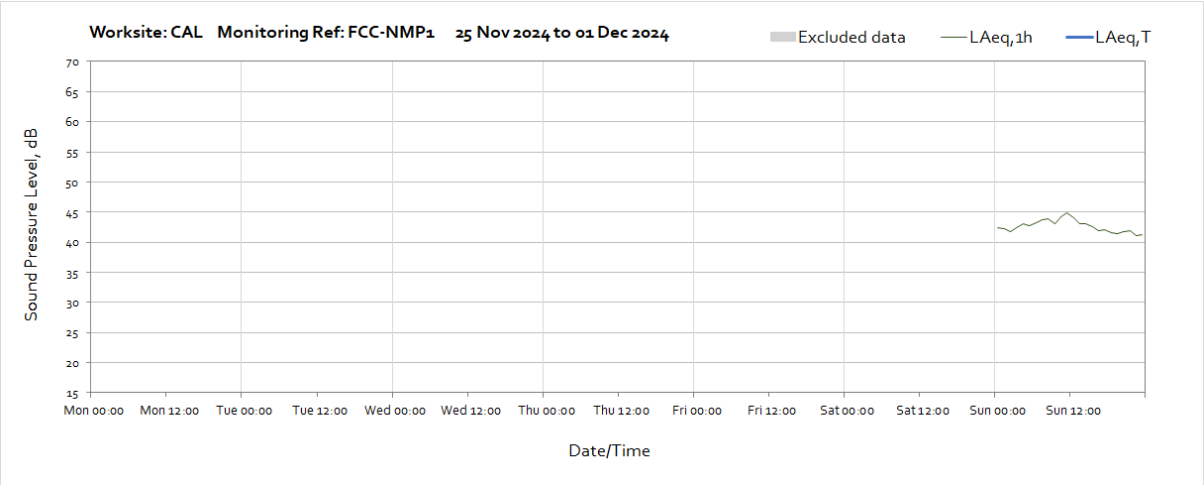


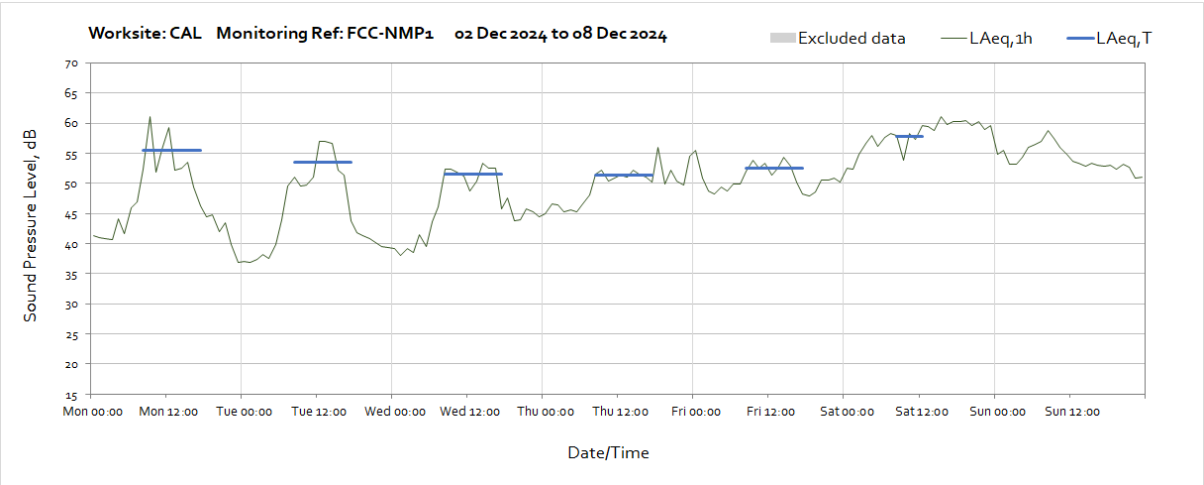
Note: Missing data between 08:00 and 10:00 on Thursday 19th December was due to battery change at the monitoring station.

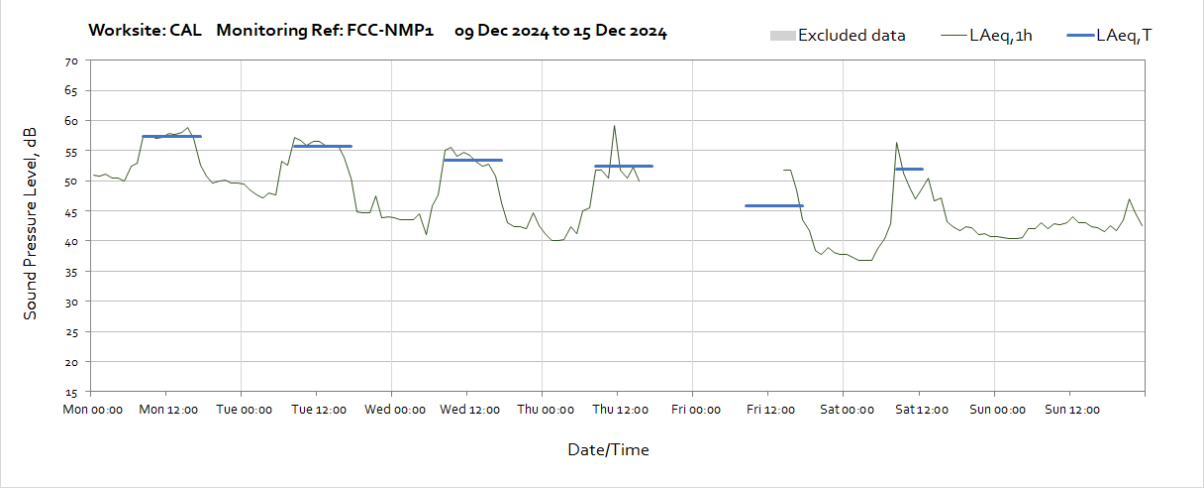




Worksite: CAL – Monitoring Re: FCC-NMP1







Note: Missing data between 16:00 on Thursday 12th December and 14:00 on Friday 13th December was due to a depleted monitor battery.

Vibration

The following graphs show the hourly measured peak particle velocity PPV recorded during the monitoring period. The graphs show the highest PPV of the three orthogonal axes x, y and z. Periods where PPV values have been affected by local interference with the vibration monitor or only measured for part of the period, which are not representative of HS2 construction works, have been greyed out and excluded when calculating values in Table 4 of the main report.
